

In my morning report, I reported
of village in A.P. 10...

According to Lohs:-

2. Agriculture credit available early.

For the first 12 members are
and "yes" are 12 members are not

"no", according to the last of the
village in it get credit early

and according village are not get
early, only some village are

enjoyed this agriculture credit in
the morning I observed for first

will it for people not getting
agriculture credit early.

Is credit available easily from institutions? -

In my survey from the 25 villagers 10 villagers are said 'yes' to 2nd train remaining 15 villagers said 'NO'.

Are you associated with SHGs? -

SHGs are very famous in village areas and important role played by SHGs.

According to my survey results, from 25 villagers 22 villagers are associated with SHGs, only 3 persons of villagers are not associated with co-operative are not associated with SHGs.

All villagers said SHGs are helpful to them.

Are you associated with any
co-operative society:-

21 villagers are not associated with co-operative societies only 4 villagers are associated with co-operative societies.

This PS said co-operative societies are not working well at villagers.

Will you be able to sell your products
directly to the market without any
help for intermediaries:-

For this basis, 20 villagers are said "yes" remaining 4 villagers only said "no".

This report shows villagers are able to sell products directly to the market without any help of intermediaries.

over all reports

From 25 villages, I observed
agriculture credit is not available
early but all are associated with
state. Co-operative societies are not
play key role.

By the government intermediaries
are eliminated. So, villagers are
directly sold to markets. All are
produce live stock.

This is shown without any
agriculture credit available the produce
and cultivate.

Remarks from survey results:-

→ Government observe the working of
agriculture credit institutions

→ expenditure reduction with control
also significant.

Supplementary → 1980-1981

→ extensive labour regulation cuts
in 'institutions'.

→ debt suspension on 'institutions'
and expenditure cuts.

Conclusions -

Agriculture is most important
than industrial because low costs
factor.
