

ASSIGNMENT FOR CHAPTER - 10

INTRODUCTION:-

Three powers India, China and Pakistan - hold the keys to the future of South Asia. As the world draws from Afghanistan and US influence in the region declines this triangle strategic relationship will be become more complicated unless the parameters of a new regional order.

The tumultuous year saw the definite next year either between India and China resumed in the last 15 years in the mountainous 10 lakh region in June. The between Pakistan and India also

remained of acts a not frequent
dashed along with the dispute
tanner and behavior bottles.

Common Success shared by India
China and Pakistan.

Environment India, China,
Pakistan have many similarities
in their development strategies as
follows.

- India, Pakistan and China
have started towards their
development both at the same time
- These three countries had start
five year plan for their development
- Till the 1980's all the three
countries had similar growth
rate & per capita income.

→ economic reforms took place in all the three countries reforms started in India in 1991 in China in 1978 & in Pakistan 1989.

→ All the 3 countries have succeeded in more than doubling their per capita income.

kept pace with the size in population leaving a little annual fluctuations due to weather conditions both countries are sufficed.

→ A well-developed modern sector has found global recognition among countries.

→ countries are able to reduce the percentage of population surviving below the poverty line but

still the numbers is very low.

→ economic reforms took a place in all the 3 countries for make development.

→ there was an existence of infrastructure in the area of education health & land reforms.

→ through the commune system there was a more equitable distribution of food grains.

why china is progressing more as compare to India and Pakistan lagging behind:-

Chinese growth has been driven by some of the world's highest investment rates. This has in turn made possible both on infrastructure revolution, new cities high speed

railines, air ports and ports man-
-facturing muscle that has been
the very of the world.

china has the worlds fastest
for 20 years. Its world ability to
quickly and efficiently move what
it produce domestically & around
the world has been a critical
component in its growth miracle.

today India lags far behind
china on all three fronts. India
in sets about 30% of GDP compared
manufacturing is about 20% of the
India economy. It is about 30%
of china has a comparable the
best physical infrastructure out
side the best western world that
it still is.

Economists generally attribute much of China's rapid economic growth to main factors.

Large scale capital investment and rapid economic growth to two main productivity growth to two main factors.

Large scale ~~an~~ capital investment and rapid ~~an~~ economic growth to two main productivity growth together hand in hand.

— THE END —
